

Spring & Summer 2024 Edition**Message from the Chair**

Steven McIntosh
Professor and Department Chair,
Zisman Family Chair in Chemical and
Biomolecular Engineering

Greetings from the Department of Chemical and Biomolecular Engineering at Lehigh University. As the summer heat intensifies, we can take a moment to reflect on the most recent achievements of faculty and students. Our focus on 'beyond the classroom' education for our undergraduates has seen a reinvigoration of our student AIChE chapter and we are looking forward to hosting the AIChE regional conference next Spring. The department continues to excel in research, teaching and student mentorship as highlighted by this selection of news stories.

Warm regards,

**Elsa Reichmanis - Elected to the
American Academy of Arts &
Sciences**

Reichmanis is an internationally recognized expert in the field of microlithography
